

## Directions to Solar Center Offices at the Varsity Research Building [Training Room use by Building Team]

Created 9/3/10; revised 3/1/2011

The Solar Center main offices are located on the NC State Campus, in the Varsity Research Building located on the corner of Avent Ferry and Varsity.

### Directions:

1. Coming from Western Blvd, take a **right** off Avent Ferry onto Varsity
  - a. **Note:** a left off of Avent Ferry will take you onto Centennial Campus—only do this if you want to go to the parking Kiosk for a parking pass before arriving at the Varsity Research building. See parking instructions below.
2. Take the **first** right into a driveway at the Varsity Research Building (there is NCSU red signage)
3. Turn right into the front parking lot
4. Notice that most of the doors have a Module number on them. Look for **Module 4** (see some extra instructions below under **Entry Door**). If no one is at the door, try knocking and then call one of the numbers below if no one comes within 30 seconds or so.
5. The Module 4 Conference Room is located in room 1203.

### Parking:

1. Turn left onto Varsity from Avent Ferry or the Varsity Research building driveway and go to the Centennial Campus Parking Kiosk on Varsity. You can purchase a \$2 parking pass for the **Varsity Research Building** parking lot at this kiosk. You will then make a u-turn and come back down Varsity to the Varsity Research Building which will be on your right. Some workshops may offer a parking pass.
2. Park as close as you can to the second but unmarked door between **Modules 5 and 6** (see Google Earth picture below).

### For the Adventurous or NCSU C permit holder:

3. If you are parking for a **short time or have a NCSU C permit**: hope to miss the parking attendant without the **NCSU C permit**.
4. If you are parking for more than 15 minutes and do not have a **NCSU C permit** park on the street as close as you can and walk.

### Entry Door:

The **best door to use for Training Room Entry**: The **Module 6** door, circled on the map below but not labeled as such; it is southwest of the **Module 4** and **Module 5** entries in the corner of the “L” (which are labeled “North Carolina Solar Center”)

The door shown on the Google Earth picture, below, provides direct access to the Training Room and Building Team members. We can hear you knock on the door if we are in our offices! Please note that all Solar Center doors are typically locked.

If you are confused by the building (it can happen!) call the person you are visiting (contacts below) so they can find you and let you in.

**For the adventurous:** find the first **Module 6** door which is located beside the Module 7 door; this door usually remains unlocked from 8 AM to 5 PM and is the entrance to WRR1 but can be used to get into the Solar Center offices. Now, you must find your way from Module 6 to Module 5. It’s possible if you stop and ask directions, so good Luck!

**Contacts:**

Jennifer's office number is 1212 (Module 4); 515-3716

Marshall's office number is 1321 (Module 5); 513-5677 (Marshall), 513-7148 (Intern phone)

Dona's office number is 1404 (Module 6); 513-0307 or mobile 919-389-4872
