Collaboartion**

Getting Around Goals

Goal GA.7: Incorporate street planning into zoning code

Action Items:

- Incorporate all forms of transportation (bike lanes, street and trail design standards, way-finding, etc.) into zoning and land use discussions
- Consider complete streets in all zoning, development and land use processes
- Any Small Area Development Plan or large development independent of Small Area Development Plans should....

WHAT WE HAVE

36 Bicycle Detector Loops

Loop Detector—An inductive (wire) loop embedded in the pavement that detects the presence of a vehicle at a signalized intersection to activate a signal change. Diagonal quadruple loops typically provide the best bicycle detection.
