## I Introduction

### Overview of UDO Mapping

The new Unified Development Ordinance (UDO) proposes to eliminate most of the non-residential and mixed-use districts in the zoning code and replace them with a new suite of zoning districts. This requires that a substantial amendment to the City's zoning map be adopted to retire these legacy districts and replace them with the new districts. This remapping, which will impact roughly 30 percent of the City's land area, will take place 18 to 24 months following the adoption of the UDO text.

Work on the new zoning map has already begun, and City Planning staff has developed a methodology for how the initial draft of the map will be drawn. This document summarizes that methodology. The chapters that follow provide a detailed comparison of existing versus proposed zoning districts.

### Proposed Adoption Process

Approximately six months following the adoption of the Unified Development Ordinance text, staff will release a draft of the new zoning map for public review and comment. The release of the map will be widely publicized, and affected property owners will receive mailed notice. Staff anticipates that the review period will last for six months, sufficient time for staff to meet and talk with property owners and neighbors to discuss and refine the draft zoning designations.

Once staff feels like the map has proceeded as far as it can go at the staff level, a revised map will be brought forward to the City Council and Planning Commission at a Public Hearing. Ultimately, the City Council has the final say on how the new zoning districts will be applied. With the adoption of the new zoning map, the legacy zoning districts and regulations will be officially retired.

During the period of time between the adoption dates of the UDO text and map, property in a legacy districts will continue to be regulated under the current development code. Property owners zoned with a legacy district and wishing to take advantage of the new code during the interim period must utilize the zoning petition process. No rezoning petition requesting a legacy district will be accepted following the adoption of the UDO text.

### Translating Legacy Districts to UDO Districts

Many existing zoning districts are being brought forward in the UDO with minor changes, including the residential districts RR through R-10, Agricultural Productive and Conservation Management. Most areas zoned with these districts will be transitioned to the new districts without remapping, and the new UDO will apply upon adoption.

For the legacy districts, the UDO provides a suite of corresponding new districts capable of accommodating both the existing development within the district as well as future redevelopment. When choosing a replacement district, staff uses the following information:

- Current zoning
- Current land use
- Current development form, such as building height and setback
- Surrounding development context and character
- Recommendations on the Comprehensive Plan's Future Land Use Map
- Detailed recommendations contained within an adopted Area Plan

The proposed UDO district should be chosen using the following criteria, in order of importance:

1. Within the bounds of good planning, the new zoning map should maintain or enhance existing entitlements.
2. The new zoning map should reflect uses on the ground and minimize the creation of nonconforming uses, unless doing so creates spot zones.
3. The new zoning map should implement the Comprehensive Plan unless doing so creates non-conformities or otherwise significantly impacts a property.
4. The new zoning map, particularly with regards to the application of height and frontage, should be sensitive to context, and not create jarring transitions in height, use or intensity.

## Mapping Height and Frontages

While the choice of a base zoning district is typically straightforward and largely based on existing use and zoning, the choice to confer an entitlement to height greater than three stories, or to apply a specific frontage requirement, is more complex. Staff is taking a conservative approach to both, and as a result the initial draft of the map will not recommend taller buildings or specific frontage requirements for every location where they might be appropriate. During the review of the draft map, the application of taller height limits and specific frontage may be expanded in response to community input. For the draft map, staff will only be recommending heights above three stories if one of the following conditions is met:

- Overlay zoning provides for taller buildings
- Taller buildings exist on the ground today
- There is a vested approval for a taller building
- The Comprehensive Plan recommends taller buildings

Staff will only be recommending specific frontages if one of the following conditions is met:

- The Comprehensive Plan recommends a specific frontage approach
- Existing zoning contains frontage standards, such as an overlay district
- There is a well-established and widely-recognized character to the area would be better preserved and enhanced through the application of a frontage.
- The area is proposed for buildings in excess of three stories in height.

## Overlay Districts

Most overlay districts are being carried forward in the UDO with minimal changes. However, there are several important overlay districts which are being retired in the UDO because their purpose and function can be better implemented through the combination of a mixed-use base district, a frontage, and the appropriate height standard:

- The Downtown Overlay and Pedestrian Business Overlay Districts (DOD and PBOD) offer the only choice in the current code for developing high-density urban mixed-use projects. The UDO replaces these with new mixed-use districts such as NX, CX and DX. Frontage and height standards will control building setback, building height, the amount of location of required parking, and the location of street level retail. Streetscape plans will continue to govern the public realm.
- SHOD-3 and 4 provide for landscaped buffers along thoroughfares and also serve to prohibit off-premise advertising (billboards) when mapped over industrial zones. These purposes are now incorporated into the Parkway (-PK) frontage.

### Legacy and UDO District Table

The following table lists all existing zoning districts, including overlays in the left column; and provides the corresponding UDO districts in the right column. Where more than one option exists, the choice of UDO district will reflect the current use as well as proposed future land uses in the Comprehensive Plan. As examples, many multi-family developments are currently zoned O&I, but may be better suited for RX rather than OX zoning. Many retail areas are located in light industrial zones, and would be better served by CX zoning. Such choices will be part of the dialog that will take place between staff, property owners and neighborhoods as the draft zoning map is developed.

## 2 Rural Residential, R-2 and R-4

### Existing Rural Residential, R-2 & R-4 Districts: Conversion/carry-forward

#### Overview

The existing Rural Residential district will be renamed R-1. The existing R-2 and R-4 zoning districts will retain the same district names. These single-family zoning districts will essentially be re-mapped across the city where they exist today.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 2.1 Permitted Uses**

Use	Current Development Code			New Development Code

### 3 Residential-6, Special R-6 and R-10

#### Existing R-6, Special R-6 & R-10 Districts

##### Overview

The existing R-6, Special R-6 and R-10 zoning districts will retain the same district names, though the word “special” is being removed from the title of the existing SpR-6 district. These zoning districts will essentially be re-mapped across the city where they exist today. The existing R-6 areas developed for townhouse or multi-family should generally be zoned R-10 to avoid making the existing uses non-conforming.

##### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 3.1 Permitted Uses**

Use	Current Development Code			New Development Code

## 4 Residential-15, R-20, R-30 and Special R-30

### Existing R-15, R-20, R-30 & Special R-30 Districts

#### Overview

The existing areas zoned for densities in excess of 10 units per acre (R-15, R-20, R-30 & SpR-30) should generally be placed within the RX District. Special R-30 is currently mapped over many areas where single-family is the predominant use and these areas should be remapped R-10. The contextual standards in the SpR-30 will be replaced with a Neighborhood Conservation Overlay District (NCOD).

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 4.1 Permitted Uses**

## 5 Residential Business (RB)

### RB: Comparison with R-10, OX and NX

#### Overview

The existing Residential Business zones will generally be re-mapped to OX unless there is retail in the area, or a desire for retail as indicated on the Future Land Use Map. Existing multi-family developments may be re-mapped to R-10 if no additional density is desired as indicated on the Future Land Use Map.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 5.1 Permitted Uses**

Use	Current Development Code	New Development Code

<b>Density</b>				
Residential density (DU/Acre)	10 Units per acre	10 Units per acre	No maximum	No maximum

## Notes:

1. Yard requirements for R-10, RX and OX assume no frontage is applied. See the Frontage Quick Guide for an overview of how the different frontage options impact yard requirements, including both minimum and maximum setbacks for parking areas and buildings.

## 6 Buffer Commercial (BC)

### BC: Comparison with R-10, OX and NX

#### Overview

The existing Buffer Commercial zones will generally be re-mapped to NX unless there is a specific need to prohibit retail in the area. Residential-10 may be used for existing multi-family developments if additional density is not desired as indicated on the Future Land Use Map. OX may be used if office or mixed-use development is indicated on the Future Land Use Map.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use L = Limited Use subject to standards S = Permitted via Special Use Permit

**Table 6.1 Permitted Uses**

<b>Density</b>				
Residential density (DU/Acre)	10 Units per acre	10 Units per acre	No maximum	No maximum

Notes:

1. Yard requirements for R-10, NX and OX assume no frontage is applied. See the Frontage Quick Guide for an overview of how the different frontage options impact yard requirements, including both minimum and maximum setbacks for parking areas and buildings.

## 7 Business (BUS)

### BUS: Comparison with DX and OX

#### Overview

The existing Business Zone will generally be rezoned DX except in areas where retail is not contemplated, such as in certain edge areas near neighborhoods where OX might be the better choice.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use   L = Limited Use subject to standards   S = Permitted via Special Use Permit

**Table 7.1 Permitted Uses**

Use	Current Development Code	New Development Code

## Notes:

1. Yard requirements for DX and OX assume no frontage is applied. See the Frontage Quick Guide for an overview of how the different frontage options impact yard requirements, including both minimum and maximum setbacks for parking areas and buildings.

## 8 Neighborhood Business (NB)

### NB: Comparison with R-10, CX and NX

#### Overview

The existing Neighborhood Business zones will generally be re-mapped to R-10 for existing multi-family developments if additional density is not desired: Otherwise CX will be the default replacement unless the context warrants it, in which NX might be selected.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 8.1 Permitted Uses**

Mixed Use Building	40 feet + 1 foot for every foot of added setback	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage
Civic Building	40 feet + 1 foot for every foot of added setback	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage
<b>Density</b>			
<u>Residential density</u> (DU/Acre)	40 Units per acre	No maximum	No maximum

## Notes:

1. Yard requirements for CX and IX assume no frontage is applied. See the Frontage Quick Guide for an overview of how the different frontage options impact yard requirements, including both minimum and maximum setbacks for parking areas and buildings.

## 10 Office & Institution 1 (O&I-1)

### O&I-1: Comparison with RX, OX, OP & CAMPUS

#### Overview

The existing O&I-1 zone has been a popular choice for multifamily developments, and many properties so zoned are developed for exclusive multi-family use. The corresponding districts for such properties in the new UDO are RX (Residential Mixed Use) and OX (Office Mixed Use). Which option will be proposed depends on context; specifically, whether or not the introduction of office uses through infill or redevelopment would be consistent with both neighborhood character and the City's Future Land Use Map. Both districts provide similar lot and bulk standards but differ in terms of permitted uses. Where residential is the preferred use, RX is appropriate. Where office and mixed-use are equally preferred to residential, OX provides greater flexibility. OX or OP are the choices for office developments, with OP being more restricted to primarily office uses whereas OX allows more of a mix of uses. The Campus designation is to be used on public or institutional campuses such as colleges and hospitals.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 10.1 Permitted Uses**

Use	Current Development Code	New Development Code		
	O&I-1	RX	OX	OP

<b>Density</b>				
Residential density (DU/Acre)	15 (Admin.) 25 (Planning Commission)	No maximum	No maximum	0 Units per acre

## Notes:

1. Reduced setbacks and/or additional height may be approved by the City Council in the O&I-2 district.
2. Yard requirements for RX, OX, and OP assume no frontage is applied. See the Frontage Quick Guide for an overview of how the different frontage options impact yard requirements, including both minimum and maximum setbacks for parking areas and buildings.

## II Office & Institution 2 (O&I-2)

### O&I-2: Comparison with RX, OX, OP & CAMPUS

#### Overview

The existing O&I-2 zone has been a popular choice for multifamily developments, and many properties so zoned are developed for exclusive multi-family use. The corresponding districts for such properties in the new UDO are RX (Residential Mixed Use) and OX (Office Mixed-Use). Which option will be proposed depends on context; specifically, whether or not the introduction of office uses through infill or redevelopment would be consistent with both neighborhood character and the City's Future Land Use Map. Both districts provide similar lot and bulk standards but differ in terms of permitted uses. Where residential is the preferred use, RX is appropriate. Where office and mixed-use are equally preferred to residential, OX provides greater flexibility. OX or OP are the choices for office developments, with OP being more restricted to primarily office uses whereas OX allows more of a mix of uses. The Campus designation is to be used on public or institutional campuses such as colleges and hospitals.

#### Permitted Uses

Mixed Use Building	25'	3 stories or 50' w/out frontage
Civic Building	25'	3 stories or 50' w/out frontage
<b>Density</b>		
Residential density (DU/Acre)	0 Units per acre	No maximum

Notes:

## I-1 Industrial 1 (I-1)

### I-1: Comparison with IX, OP, IH and CX

#### Overview

The existing Industrial-1 District will generally be re-mapped to IX unless primarily used for offices today. In those areas with a predominately office use, OP may be the best replacement district. In areas where retail is not desired or where there are existing heavy-industrial uses, the properties will be re-mapped to IH. When developed for retail and designated for mixed-use development on the Future Land Use Map, CX may be used.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use    L = Limited Use subject to standards    S = Permitted via Special Use Permit

**Table 13.1**

Agriculture, Except as Listed Below:	P			P	
Community Garden		L	L		L
Plant Nursery, Fruit, Vegetable Sales	P	P			P
Restricted Agriculture	P				
Resource Extraction	P			S	

P = Principal permitted use    L = Permitted subject to conditions    S = Permitted via Special Use Permit

#### Lot, Bulk and Density Standards

Table 13.2

	Current Development Code	New Development Code			
	I-1	IX	OP	IH	CX
<b>Minimum Lot Requirements</b>					
Lot area (sq. feet)	5,000	10,000	10,000	No minimum	6,000 Detached

	Current Development Code	New Development Code			
	I-1	IX	OP	IH	CX
					6,000 Attached 3,700 Townhouse 10,000 Others
Lot width	45' 60' corner	100'	100'	No minimum	50' Detached 50' Attached 16' Townhouse 100' All Others
Lot depth	70'	No minimum	No minimum	No minimum	No minimum
<b>Minimum Setback Requirements</b>					
Primary street	0'	10'	10'	50'	10'
Side street	0'	10'	10'	50'	10'
Side lot line	0'	6'	6'	0'	5' det./attached 6' all others
Rear lot line	0'	6'	6'	0'	10' det./attach 6' All others
Alley	0'	5'	5'	n/a	4'-20' det/att/twnhse 5' All others
Aggregate front/rear	0'	n/a	n/a	70'	n/a
Aggregate side yard	0'	n/a	n/a	40'	n/a
<b>Floor Area Ratio and Building Coverage for Office Buildings</b>					

	Current Development Code	New Development Code			
	I-1	IX	OP	IH	CX
Floor area ratio	n/a	No maximum	No maximum	No maximum	No maximum
Building coverage	n/a	No maximum	No maximum	No maximum	No maximum
<b>Height (By Building Type)</b>					
Detached House	40 feet + 1 foot for every foot of added setback				3 stories or 40' w/out frontage
Attached House	40 feet + 1 foot for every foot of added setback				3 stories or 40' w/out frontage
Townhouse	40 feet + 1 foot for every foot of added setback				3 stories or 50' w/out frontage
Apartment	40 feet + 1 foot for every foot of added setback				3 stories or 50' w/out frontage
General Building	40 feet + 1 foot for every foot of added setback	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage
Mixed Use Building	40 feet + 1 foot for every foot of added setback	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage
Civic Building	40 feet + 1 foot for every foot of added setback	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage	3 stories or 50' w/out frontage
<b>Density</b>					
Residential density (DU/Acre)	0 Units per acre	No maximum	0 Units per acre	0 Units per acre	No maximum

Notes: Yard requirements assume no frontage is applied. See the Frontage Quick Guide for an overview of how the different frontage options impact yard requirements, including both minimum and maximum setbacks for parking areas and buildings.

## I4 Industrial 2 (I-2)

### I-2: Comparison with IX and IH

#### Overview

The existing Industrial-2 District will generally be re-mapped to IX. In areas where retail is not desired or where there are existing heavy-industrial uses, the properties will be re-mapped to IH.

#### Permitted Uses

The following table provides an overview of common permitted uses in each district.

P = Principal permitted use L = Limited Use subject to standards S = Permitted via Special Use Permit

**Table 14.1 Permitted Uses**

Use	Current Development Code	New Development Code	
	I-2	IX	IH
Single-Unit Living			
Two-Unit Living			
Multi-Unit Living		L	
Multi-Unit Supportive Housing Residence	L	L	
Supportive Housing Residence		L	
Group Living, Except as Listed Below:		P	
Boardinghouse			
Congregate Care		L	
Fraternity/Sorority, Dorm		P	
Hospitality House		P	
Life Care Community		L	
Rest Home		P	
Social Service, Except as Listed Below:			
Emergency Shelter Type A	L	S	L
Emergency Shelter Type B	L	L	L
