**Stormwater Management Advisory Commission**

**Sub-Committee Meeting #4 for Input and Guidance to Integrated Stormwater Project  
Prioritization Model Development**

Thursday, July 30, 2015  
3:00 pm – 5:00 pm

Stormwater Conference Room, 8<sup>th</sup> Floor  
Professional Building, 127 West Hargett Street

3:00 **Welcome, Introductions**

3:10 **Project Prioritization Model Development – Additional Input**  
*Scott Bryant – Stormwater Strategic Planning*

Whereas the Integrated Stormwater Project Prioritization Model was generally well-received by SMAC during the recent July 9<sup>th</sup> presentation, two areas of the working model were identified for additional Sub-Committee review, input, and potential further enhancement.

- 1) Review the basic eligibility language related to project consistency with the City's Strategic Plan and Comprehensive Plan, and
- 2) Review the project cost information and project cost factors in the model.

The Sub-Committee will also have an opportunity to incorporate a review and discussion of the working final model criteria weights and sub-criteria weights.

Time allowing, staff can facilitate a brief review of the continued scoring metrics development.

5:00 **Adjourn**
