

City Of Raleigh

NORTH CAROLINA

May 1, 2014

Greetings Northshore Lake Residents and Surrounding Community:

I wanted to give you an update on the Northshore Lake and Dam Rehabilitation Project. The City of Raleigh is pleased to let you know that construction will begin on Northshore Lake and Dam Rehabilitation project very soon. The City has put together a project team that will oversee the repair of the dam, spillway, and dredging of the lake. I anticipate construction beginning by the end of this month.

The project team will consist of Stormwater Management staff, our contractor, and our consulting engineer. I will be your primary point of contact for the project. The City Council has approved Centurion Construction Company, Inc. as the contractor and HDR Engineering, Inc. of the Carolinas as the consulting engineer to support the City team during construction.

Once the contractor has been issued a notice to proceed by the City, they will have 365 days to complete the project. The contractor will primarily work Monday through Friday between the hours of 7:00 am through 6:00 pm. The City will allow the contractor to work on weekends on a case-by-case basis in order to complete specific elements of the job or if inclement weather occurs during the work week. The contractor will install construction entrances, and tree and silt fencing at the beginning of the project. The contractor will begin working near the dam before moving on to the lake body.

I hope you have found this letter helpful and I will continue to keep you updated. Once construction begins, notices regarding the project will be placed on your front doors and will include important contact information for everyone involved in the project (***continued***)
