

HELP REPORT & ELIMINATE ILLEGAL DUMPING INTO OUR SEWER SYSTEM

Only authorized personnel may access public manholes or privately owned grease interceptors for maintenance and monitoring activities.

Illegal dumping may result in clogged or overflowing sewer lines, disruption of wastewater treatment plant processes, damage to sewer lines, buildup of toxic gases in the lines, and/or harmful discharges into the environment.

See it

- Trucks discharging unknown substances into manholes in residential neighborhoods or near vacant lots, typically at night.
- Foul smells with no apparent explanation.
- Grease interceptors that appear to be full of water and grease shortly after a service company finishes pumping the grease interceptor.
- Septage hauling companies that offer services for significantly less than competitors.
