1. Silt fence should be installed to ensure construction entrance is used.

2. If mud is not removed from the vehicle traveling over the stone, then the tires of the vehicle must be washed before entering the public road or the length of the construction entrance extended.

Notes:
- Silt fence should be installed to ensure construction entrance is used.
- If mud is not removed from the vehicle traveling over the stone, then the tires of the vehicle must be washed before entering the public road or the length of the construction entrance extended.
- 25' or full width of proposed street or entrance, whichever is greater.
- 3'-4' stone to be used (subgrade stone or railroad ballast).
- See N.C. DEQ Erosion and Sediment Control Planning and Design Manual for conditions where practice applies; planning consideration & design criteria.
